

Workplace Health and Wellness

occupational health & safety risks
 absenteeism
 chronic disease
 communicable diseases (HIV, TB)
 legal compliance
 general wellbeing
 medical scheme and insurance costs

To ensure optimal health and wellness management of your people you need to take into account the above and other interdependent factors.

These factors are indivisible – together they impact directly on the financial status of your organisation, on its overall ability to compete in its industry as well as its continued success.

**Integrated,
 risk-based
 Employee Health
 and Wellness
 Solutions**

A fit for work Workforce

EOH Workplace Health and Wellness provides customised turnkey Employee Health and Wellness Programmes (EHWP) to medium and large employer groups **across all industries**, thereby ensuring legislative compliance and a healthy and productive workforce. This results in health **risk mitigation**.

Our health solutions are based on a thorough consultative process to build the solution that best fits your business.

Our team of health professionals, within the **Workplace Health and Wellness** unit, has a **rich history** in the industry and a **high knowledge index** of the specific areas of EHWP. Our understanding of the **value of integrating** these areas for organisations is what sets our offering apart from that of our competitors.

Systems make it possible...
 People make it happen

The Employee Health and Wellness Programmes (EHWP) comprise solutions in the areas of:

▲ Occupational Health - Legal Compliance & Risk Management - including Primary and Emergency Care

EOH Workplace Health and Wellness works closely with each client to understand the specific risks and develops risk-based solutions. These solutions may include an on-site resourced service, off-site services via its facilities, mobile services or a combination thereof.

▲ Disease, Incapacity and Disability Management

We manage disease in a pro-active manner by putting support programmes in place to help employees live a better quality of life and prevent future complications to employee and employer.

▲ Employee Wellbeing including Executive Health

We empower and support employees towards healthier lifestyles and more productive work lives.

▲ Health Promotion

In order to kick-start behaviour change toward optimal wellbeing, it is necessary to create a strong sense of awareness about one's total wellbeing status. Health Promotion is done in accordance with a formalised and targeted marketing and communication strategy developed with the client.

▲ Health Information Management

In order to manage risk, data is required. EOH Workplace Health and Wellness has developed health specific information systems to ensure data is available for reporting purposes. Systems are integrated to report on various health aspects of your organisation.
